## **DETAILED ACTION**

### ***Election/Restrictions***

It is noted that claim 31 is not part of the elected embodiment and therefore has been withdrawn.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 17, 19, 20, 21, 22, 23, 24, 25, 27, 32 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The expression "said means for supporting" (claims 1, 32) has no definite antecedent basis in the claims. Claim(s) 31 fail(s) to recite sufficient structural elements and interconnection of the elements to positively position and define : 1) how the shaft is hidden (claim 31) so that an integral structure able to function as claimed is recited.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 17, 19, 20, 22, 24, 27, 32 as defined, are rejected under 35 U.S.C. 102(b) as being anticipated by Kirker. The patent to Kirker teaches structure as claimed including a pallet comprising a base and support means (36, 44), the support means capable of moving toward or away from each, such is capable of moving at "the moment of receiving and/or releasing" a portion of an armature.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 21, 25, 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kirker. The patent to Kirker teaches structure substantially as claimed, as discussed above including actuating means (fig. 2) the only difference being that the actuation means is not a pneumatic type. However, the use of different conventional alternative actuating means, such as pneumatic structures, geared structures, screw threaded structures in the same intended well known purpose are matters of desirability

and choice and would have been and well within the level of ordinary skill in the art at the time of the invention, thereby providing structure as claimed. The method would have been obvious in view of the structures.

***Allowable Subject Matter***

Claim 23 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Claim 33 is allowable over the prior art of record.

***Response to Arguments***

Applicant's arguments filed 08/07/06 have been fully considered but they are not persuasive. Note the rejections above.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

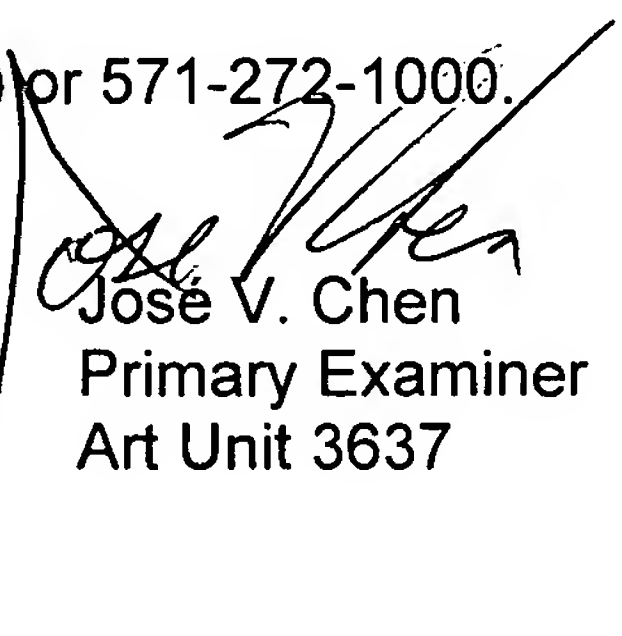

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
